Average of AHT  
(MIN)

6.01

-**Performance Gaps:** Identified extreme AHT outliers (e.g., **20.13 min** vs. a **6.01 min** average), highlighting a critical need for targeted quality coaching.

-**Operational Leakage:** Detected **2,882 total Lost Hours**, with specific individuals accounting for over **200 hours** each, signaling payroll or system logging errors.

-**Underutilization:** Discovered a low **30.5% team occupancy**, indicating significant "Idle" time and potential overstaffing relative to current call volumes.

-**Benchmark Standards:** Recognized top performers achieving **100% Conformance**, establishing clear internal standards for schedule discipline.

-Shift Load: Night shift handles 3x more cases than the Day shift (15% vs 5%).

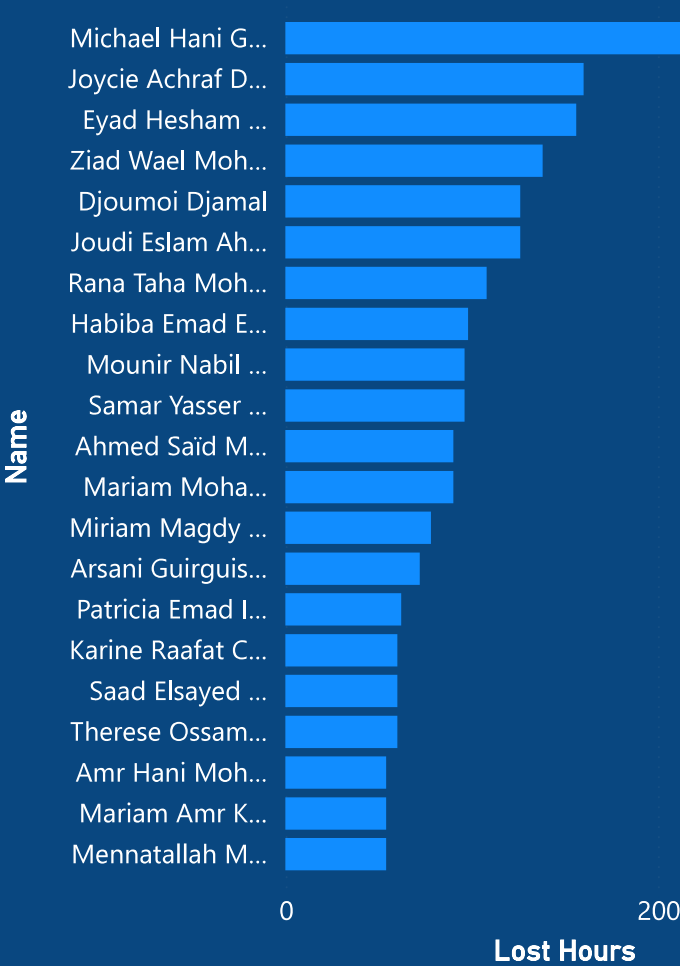

-Shift Efficiency: Night shift has a slightly higher AHT, likely due to the higher volume of cases.

-Top Losses: Michael Hani and Joycie Achraf account for the highest Lost Hours, requiring immediate operational review.
