

Hourly Abandonment Analysis

- 7:00 PM - 7:30 PM Critical Gap: Consistent 100% abandonment rate at the end of the day. This indicates a total lack of staffing during the final shift hour.
- Morning Rush (8:00 AM - 10:00 AM): High pressure with abandonment fluctuating between 40% and 60%. Current morning shift starts don't match the early call volume.
- Day 20 Outlier: Day 20 shows an unusual spike across almost all hours. Likely an operational issue or system downtime that needs investigation.
- Optimal Performance Window: The period from 10:30 AM to 12:30 PM is the most stable, where staffing levels effectively meet call demand.

Date

9/1/2024

5/15/2025

- The Efficiency Gap:** We have a major gap between Answer Rate (54%) and SL (13%). We are picking up calls, but way too late.
- Volume Overload:** Inbound spikes to 226K calls, mostly between 11 AM and 2 PM. SL flatlines during these hours, showing we can't keep up with the rush.
- End-of-Day Drop:** Performance and volume crash after 7:00 PM. Looks like a hard stop for the shift with no coverage for late callers.
- Staffing Issue:** The data suggests we have enough people to pick up 54% of calls eventually, but not enough to pick them up *fast*.

Total SL

Average of Answered, Average of Abandoned, Total SL % and Total Answer Rate by Hour

Hour

12/30/1899

12/30/1899

✓ **Peak Load:** Inbound volume peaks during the **first week** (Day 5), requiring maximum staffing levels.

The Wait Paradox: High answer speeds often lead to lower hold times, suggesting **call rushing** or **early abandonment** under pressure.

Efficiency Gap: Most calls are answered within **800-1200s**. To hit SL targets, this must drop below **500s**.

Performance Strain: Continuous high volume between **Day 5 and 10** is the primary driver of monthly KPI failure.

Hour	Total SL %
7:30:00 AM	100%
8:00:00 AM	9%
8:30:00 AM	5%
9:00:00 AM	11%
9:30:00 AM	11%
10:00:00 AM	15%
10:30:00 AM	15%
11:00:00 AM	13%
11:30:00 AM	11%

12:30:00 PM	12%
1:00:00 PM	11%
1:30:00 PM	11%
2:00:00 PM	10%
2:30:00 PM	11%
3:00:00 PM	14%
3:30:00 PM	19%
4:00:00 PM	20%
4:30:00 PM	21%
5:00:00 PM	17%
5:30:00 PM	20%
6:00:00 PM	15%
6:30:00 PM	17%
7:00:00 PM	2%
7:30:00 PM	0%
Total	13%

- **The 13% Gap:** Our Service Level is critically low. To hit targets, we must shift staff from low-volume night shifts to the **11 AM – 3 PM** peak.
- **Speed vs. SL:** Data shows that once **Answer Speed** exceeds **500s**, the SL collapses. Lowering speed is our #1 priority.
- **Staffing Alert:** The **7 PM shift** and the **first week of the month** (Days 5-10) are our weakest points; they need immediate headcount support.
